2011 current environmental issue:

“Salt and Fresh Water Estuaries”

The students will explore how society may prioritize and judge the costs and benefits of restorations, preservation, and exploitations of the marshes so as to reach an optimum balance in future landscape plans.

Canon Envirothon Facts:

- Hosted in Canada every five years
- High school teams from 48 states and 10 Provinces/Territories participate in this competition
- Eight day event which includes field testing and training, educational tours, oral presentations, committee meetings, and visitor leisure activities
- Teams of five students study 5 topics: forestry, soils and land use, aquatic ecology, wildlife, and a current environmental issue that changes annually.
- More than 800 participants
- **Youth, Environment, Education!**
